## DETAILED ACTION

### *Specification*

1. The attempt to incorporate subject matter into this application by reference to U.S. patent application no. \_\_\_\_\_, entitled "System, Method, and Article of Manufacture for Locating and Communicating with a Patron at a Hospitality Facility" is improper because it lacks a referencing application serial number and is considered essential subject matter included in the specification. Correction is required.

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-34 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Schneier et al. '398. Schneier et al. discloses receiving from a first client terminal (an agent terminal, AT) at which a player will make a purchase request for at least one wager from a central management computer (CMC) (5:56-67 and 6:1-7) and the results will not be revealed on the AT, a player account is debited based on a purchase request or prize winning where it would be inherent that debiting occurs by subtracting purchase amount from an account balance (19:1-21 and 20:40-52), determining an outcome of the purchased wager on the CMC (15:59-67), the outcomes are stored in a database in the CMC (7:39-41), receiving from a second client terminal/HTV a request for the CMC to allow the wager outcome (14:55-60) sent in the form of an authenticatable game

authorization message (AGAM) to be revealed. Schneier et al. also discloses that a managing authority can track player related information and store it in a player database (11:51-56), thus it is inherent from this disclosure and the above discussed limitation of player account debiting that during all transactions a player identifier is used and would be received at the first client terminal. In addition Schneier et al. also teaches that communications between the AT/HTV terminals and the CMC can be accomplished through various types of interactive communication networks (6:26-27 and 6:32-41).

In re claim 2-4 and 13-14, Schneier et al. discloses the above-mentioned limitations and in addition, that a purchase may include a purchase amount of "m" tickets and a denomination value represented through different price points (17:1-9). Likewise, it is inherent through the disclosure that a number of wagers maybe purchased since the gaming system as established, includes a plurality of game and purchase terminals allowing concurrence of multiple separate purchases and game play.

In re claims 5 and 27, Schneier et al. discloses the above-mentioned limitations in addition to a plurality of agent terminals (5:63) that are located on-site at retailers/merchants (6:5-7).

In re claims 11 and 12, Schneier et al. discloses the above-mentioned limitations in addition to a player may communicate messages in response to suitable prompts/menu to purchase wagers/outcomes (10:33-55).

In re claim 19, Schneier et al. teaches that a player can continue game play until player balance is equal to zero (19:16-21 and 20:40-44).

In re claim 20-21 and 24-25, Schneier et al. discloses the above-mentioned AGAM that consists of authentication data including biometric data such as fingerprints (7:48-67).

In re claim 23, Schneier et al. discloses the above-mentioned limitations in addition, it is shown from Fig. 1, a plurality of client terminals are connected to a server and exist for the execution of the gaming system thus described.

In re claim 26, Schneier et al. discloses the above-mentioned limitations in addition to an output device (HTV) in a touch-screen arrangement with player controls to select various game functions (12:8-14). Also disclosed is an embodiment where the AT and CMC are combined into one unit where game/wager purchases will be made through the HTV. In this arrangement it is inherent that a menu be offered including that which will provide a player with game/wager purchase selections.
